

Doing good™ through cutting edge Websites

Your strategy, program, and technology landscape is constantly changing and shifting in this age of digital everything. Digizent walks with you, providing innovative solutions to help you succeed in a digital world. We will help you create experiences for your audience that are engaging, strategic, and inspiring, but more importantly, that generate results to further your mission.

Websites

Your website should be an easy and positive online experience for your donors.

Effective websites are a strategic blend of exacting information architecture, intuitive user experience, compelling design, motivational and informative copy, and technical brilliance. Every page must be at its best on every device: desktop, notebook, tablet, and phone.

With the rapid pace of technology advances, a two- or three-year-old website is probably in need of refreshing — or possibly something more substantial. This is where Digizent excels! Our team stays on top of the constantly evolving technologies and trends to bring you online success on time and on budget.

Digizent will walk with you each step of the way, delivering:

- Comprehensive strategy and user experience (UX)
- Website creative design
- Technical code development and deployment
- Optimization and management
- Security maintenance and updates
- Easy-to-use FlexFormz online donation forms

“

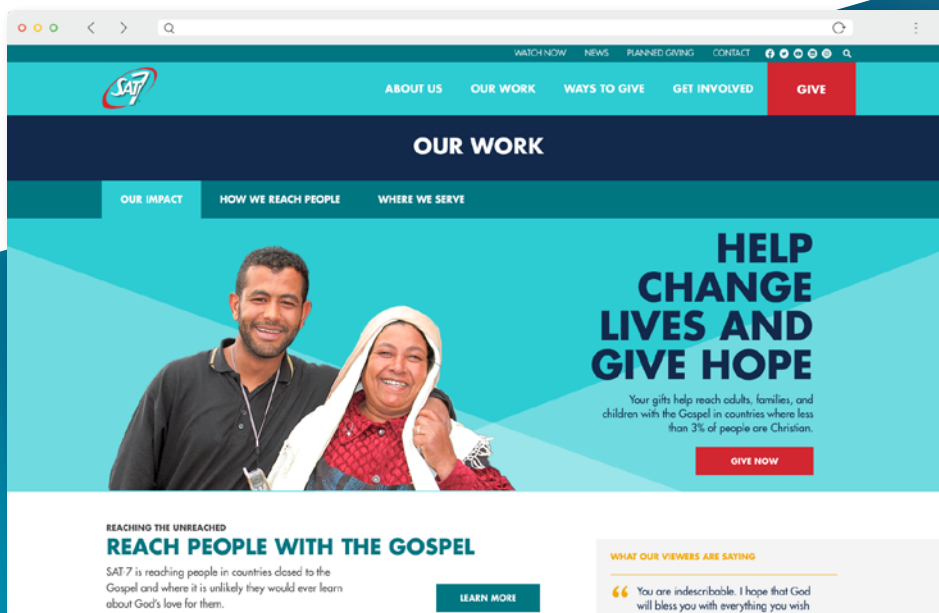

The team at Digizent are experts at creative problem solving, technical know-how, and project management. They walked with SAT-7 through the process of building and launching a website that met our growing needs and performed beyond our expectations. Not only is the Digizent team professional and proficient, but they act as an extension of our staff. Working with Digizent is a pleasure.
